

Building Partnerships, Inspiring the Future

WiseNet Asia is a professional human resource advisory firm specialising in executive search and collaborative partnerships. We recognise time is your valuable limiting resource, and we alleviate this constraint through our range of human resource related services, specifically catered to the needs of your organisation. With offices situated around Asia, we are strategically positioned within reach of our clients and can offer quality assistance to international organisations looking to expand their presence in Asia.

Executive Search

Our executive search teams consist of highly dedicated consultants who are passionate about identifying and building mid to senior leadership teams for our clients.

From the initial phase of working alongside clients and discovering key talent gaps including talent mapping, to innovative methods of uncovering suitable talents for the role, right down to managing expectations in salary negotiation – we make sure clients are timely informed in all stages of the search process.

We add value to you through our professional insights and individualised solutions on senior talent management. Together, we create meaningful relationships through transparent communication, fostering stronger bonds in the long run.

Career Transitions

Well-equipped with the knowledge on organisational restructuring and its challenges, we serve as guidance, to both organisation and transiting business leaders, realigning their corporate goals and direction.

Outplacement Programme – Identifying and tailoring to needs, we design career building and life skills for transiting professionals to enjoy a seamless integration into their next career choice.

Spousal Relocation Programme – Matching individual skills, personality and goals to career opportunities, we help trailing spouses settle into their new environment.

Executive Coaching - A comprehensive range of tailored learning modules and trainings that will keep leaders at the height of their game.

HR Outsourcing Services

We created a cloud-based management system, accessible via desktop or mobile, so you can spend more time on strategic matters instead of administrative procedures.

WiseNet HR Outsourcing software makes it possible to automate selected admin processes as desired.

It rids organisations from complexities and inconvenience, by integrating front and back-end software processes for the company and its employees.

Highly customisable, select your range of relevant modules: **Payroll, Leave, Claims, Admin** – and define your own parameters to create a management system of perfection, just for your organisation.

Learning & Development

Our Learning Development programmes offer learning solutions to inspire and align business leaders in Asia to achieve maximum success.

Conducting needs discovery together with our clients, we collaborate with renowned learning organisations in Singapore to customise programmes designed to unlock participants' potential and boost their skillsets.

Some of the learning solutions include Lean Innovation, Cultural Immersion, Risk and Strategic Management, and soft-skills training.
